PROFESSIONAL SUMMARY

Computer Science undergraduate and Full-Stack Developer specializing in high-performance web architectures using the MERN stack and Next.js. Engineered secure, AI-integrated platforms featuring OAuth 2.0, JWT authentication, Row Level Security (RLS), and LLM-driven data parsing optimizations. Demonstrated rigorous algorithmic proficiency by solving 300+ data structures and algorithms problems on LeetCode. Adept at designing scalable REST APIs, relational/NoSQL database schemas, and modular UI components. Eager to leverage strong computational fundamentals and an adaptable engineering mindset to tackle complex technical challenges across diverse technology domains.

KEY EXPERTISE

Java JavaScript (ES6+) Python SQL React.js Next.js Tailwind CSS Responsive Web Design Node.js
REST APIs Authentication (JWT/OAuth) MongoDB PostgreSQL Supabase Git GitHub Vercel
Data Structures & Algorithms Object Oriented Programming DBMS Operating Systems OpenAI API
Prompt Engineering

EDUCATION

J.C Bose University of Science & Technology, YMCA, Faridabad
B.Tech. - Computer Engineering - Data Science | CGPA: 8.19 / 10

2023 - 2027

DAV Public School, Sector-14, Gurgaon
12th | CBSE | Percentage: 89.20 / 100

2023

Delhi Scholars International School
10th | CBSE | Percentage: 91.33 / 100

2021

PROJECTS

NotebookAI

Key Skills:

React.js JavaScript Tailwind CSS Supabase PostgreSQL Google Gemini API JWT Authentication
Row Level Security Rest APIs LLM Integration Cloud Storage Vercel

Project Link: <https://github.com/thepriyanshiroy/NotebookAI>

Note & Workspace Management: Engineered an interactive student dashboard allowing users to create personal notebooks and organize markdown notes across nested workspace sections.

Database & Synchronization: Structured a PostgreSQL relational schema on Supabase to track data hierarchies with seamless, real-time backend synchronization.

AI & Document Processing: Integrated Google Gemini AI to parse uploaded PDFs and generate instant summaries, caching results locally to eliminate redundant API latency.

Secure Authentication: Implemented a secure login system using JWT-based authentication paired with Supabase Row Level Security (RLS) to fully protect individual user data.

ResumeGenie

Key Skills:

Next.js Node.js Express.js MongoDB Mongoose ODM JavaScript (ES6+) Tailwind CSS OAuth 2.0
NextAuth.js API Security REST API Design Data Modeling Text Parsing

OAuth & Authentication: Integrated NextAuth.js for secure user social login, protected routing, and isolated profile dashboard session management.

Frontend Analytics: Built a dynamic dashboard with Next.js rendering real-time ATS scoring metrics, progress indicators, and section structural health.

Backend PDF Parsing: Developed Express REST APIs to process uploaded PDF resumes, extracting raw text for multi-layer keyword coverage algorithms.

Database & Recommendations: Modeled MongoDB schemas using Mongoose to track analysis history and systematically generate dynamic optimization insights.

ACHIEVEMENTS

- Solved 300+ algorithmic and data structures problems on LeetCode.

ASSESSMENTS / CERTIFICATIONS

Python for beginners

Provider: Udemy

Key Skills: Python

The Complete JavaScript Course

Provider: Udemy

Key Skills: JavaScript

CO-CURRICULAR ACTIVITIES

- Joint Secretary, Nataraja Western Dance Club – Assisted in planning, coordinating, and managing club activities and performances while working closely with team members and club leadership
